

# THE PEOPLE'S SOCIETY OF HOSUR

## Preamble:

*As citizens of Hosur who have resided here for decades, most of us have witnessed the awesome development of Hosur from a sleepy agrarian village to a bustling industrial town, moving on to becoming a big city. We are indeed proud of the growth and employment opportunities provided to people and now to the world. We can proudly state that the best of schools & industries are present in Hosur and recognized at national and international stage . We also have significant contributions made in the areas of Horticulture and Agriculture. **Hosur is indeed a large melting pot of cultures and languages** and can rightly become an example in secularism.*

*Most of us have experienced the salubrious weather conditions in the early 1980's to the beginning of the 20th century. However, currently this seems to be **slipping at an alarming rate** due to felling of greenery for unplanned urbanization that has taken a toll on the water of the lakes and above all the non-occurrence of adequate monsoons consequently leading to low ground water tables at Hosur.*

*Our grandparents saved nature and earth with least damage. In the same way, we have to save, preserve & protect nature and*

mother earth for us & our future generations .We are currently enjoying the latest scientific developments which has reached unimaginable levels at the expense of our natural resources which is fast deteriorating day by day due to many factors . Forty years ago, we had pure water and air, wherever we went, now the situation is different. We use non-biodegradable materials, pollute our resources, and **indiscriminately alter nature's designs** without knowing the evil effects that it will cause later on. It is high time **everyone wake up to this reality** and stop activities that will harm nature.

### **Need for Transformation and Total Quality management:**

The time has come for each one of us to stand up and jointly support various initiatives in a sustained manner and thereby **TRANSFORM HOSUR** into a clean, beautiful, sought after destination on the Planet, with salubrious weather having all modern amenities and infrastructures within a time frame of 12 years from now (2025).

Thus, on **15th June 2013** to address this Vision for Hosur & its Citizen's a people's movement called "**The People's Forum Of Hosur** " (Now, **The People's Society Of Hosur, (TPSOH)** was initiated by Manikoth Prasad an Educationalist & Industrialist with the sole objective of putting our Strengths to work, Communicate Hope and making a responsible future through **collective team work**. Ultimately, it's about **making**

**things happen** even when there seems to be no solution.....through **joint efforts** !

We are aspiring **to improve the Quality of life,** create better opportunities for livelihood and offer sustainable solutions for Socio - Economic growth and development.

We are **catalyzing “CHANGE”** by exploring and promoting the development of new ideas and initiatives among people. It is change, continuing change, inevitable change that is the driving force in today’s society except holding on to our value systems, like **integrity, commitment, honesty and loyalty**. Let’s welcome change with enthusiasm, it is what keeps us going.

Please do not think what we do as an individual is not important and will not impact change. Please do not even for a moment think that individuals cannot change the course of human events **because individuals can** and will change the course of human events. It is these several individuals that make up our society. When **everyone becomes self-disciplined,** society becomes disciplined.

## **PEOPLE POWER “WHY TPSOH”**

*The People’s Society of Hosur abbreviated as “TPSOH” was launched on 15 June 2014 with a specific purpose. It is not yet another Organization/ NGO but a People’s movement that is Non-political & Non-sectarian. TPSOH is a registered Public charitable organization bearing Reg no 111/2014. We have also obtained 12AA & 80 G Exemption from the Income Tax authorities. It takes into its fold people of all walks of life and people following different religions, States and Nationalities working in Hosur and residing in and outside Hosur.*

*TPSOH will serve as a common platform to tackle common issues. Through this platform TPSOH has united people from all walks of Life, where people would come together to listen, share and discuss important issues. These meetings would serve to not only bring People together, but also in allowing them to express their views, ideas freely .It will also be an important first step towards understanding the community needs and goals and towards putting in place a more substantive participatory process through application of co-operative and mutual solutions. TPSOH has been accepted by the People of Hosur as a vehicle to improve the welfare of everyone and everything with the support of the Government*

## **Guiding Principles**

*TPSOH is built on the already now well known principles of “For the People, By the People and Of the People. The DNA of this People’s movement, if we may say so, rests on the now accepted consent of “No Blaming, No Shaming and even No Anger”. Every given situation presents itself the way it is and it would be our joint efforts involving practically everyone concerned in working a way out with a solution to the challenge. We invite the Entire population of Hosur to join us and make a huge impact in our journey towards Transforming Hosur in every Conceivable way*

*TPSOH will be guided by the values of Democracy, Equality, Equity, Shared responsibility, Solidarity, Mutual self help and Self direction. There would be absolutely no pulling or pushing people. People would be self driven through their Own passion, which is when serving becomes joy and fulfilling. There are several committees in TPSOH to ensure focused attention and finding the best possible idea / solutions for any given situation by providing people this opportunity to express their passion in the given areas of interest. Hosur needs your support.*
